IT Helpdesk FAQ

How do I connect to the VPN?

Install the Orbitra Connect app from the self-service portal. It uses WireGuard under the hood and signs you in with your company account. The VPN is required for the ops console and for any internal dashboard.

How do I reset my password?

Go to id.orbitra.example and choose 'Forgot password'. Passwords must be at least 14 characters long. Multi-factor authentication (MFA) with an authenticator app is mandatory for every account; SMS codes are not accepted.

When do I get a new laptop?

Laptops are refreshed every 3 years. Engineers may request a higher-spec machine with their manager's approval. Lost or stolen devices must be reported within 24 hours so they can be wiped remotely.

How do I contact the helpdesk?

Open a ticket in the self-service portal or call extension 4357 (H-E-L-P) between 8:00 and 18:00 local time. Priority 1 issues (you cannot work at all) are answered within 30 minutes.
